EDUCATION

Master of Computer Applications (MCA) <i>Kristu Jayanti College</i> CGPA: 8.2 / 10	Dec 2024 – Jun 2026 (Expected) Bangalore, India
Bachelor of Computer Applications (BCA) <i>CMR University</i> CGPA: 7.49 / 10	Jun 2021 – May 2024 Bangalore, India

TECHNICAL SKILLS

Programming Languages: Python, Java, PHP, JavaScript, SQL, HTML, CSS, R
Mobile & Cross-Platform: Flutter, Android Development, iOS Development
Web Frameworks & Libraries: React, Next.js, Tailwind CSS, Bootstrap, Streamlit
AI & LLM Technologies: Hugging Face, RAG (Retrieval-Augmented Generation), OpenRouter, Ollama, LLM Automation, Prompt Engineering,
Cloud, DevOps & Infrastructure: AWS, Firebase, Supabase, Docker, Vercel, Linux, CI/CD Pipelines, Hadoop
Tools & Platforms: Git, GitHub, Stripe CLI, Figma, API Integration, Deployment Workflows
Core Competencies: OOP, SDLC, Web3 Integration, Authentication Systems, Scalable Application Design

EXPERIENCE

Bhai.AR <i>Full-Stack Developer Intern</i>	Bangalore, India Nov 2025 – Present
- Architected full-stack applications with scalable deployment workflows using Flutter, Next.js, and Firebase/Vercel infrastructure, improving delivery efficiency and product iterations. - Built a Business Model Canvas Generator with Gemini API and automated billing using Stripe subscriptions, enabling users to export PDF/Excel/Image formats and accelerating business validation workflows. - Developed “WealthScope,” a market intelligence dashboard by scraping real-time company market caps and Forbes data, computing founder-company valuation gaps with visually rich UI animations. - Delivered a Meal Recommendation App in Flutter using a personalized preference pipeline, packaged a signed Android APK and achieved seamless onboarding with 95% crash-free sessions. - Created a product catalog web experience featuring 50+ curated household items with conversion-focused UI/UX to assist users in flat and furniture planning. - Engineered a cross-platform Prompt Sharing Platform with Supabase storage buckets, Meta media parsing (Instagram URLs), AI-driven tagging, and CI/CD automated releases across Web & Android. - Collaborated with design teams using Figma and implemented secure authentication, role-based access, and highly reusable modular component structures across systems.	
Freelance — Bhuvaneshwari Stores <i>Full-Stack Developer</i>	Bangalore, India Mar 2025 – Apr 2025
- Built a full grocery management system with PHP for both frontend and backend, enabling product browsing by category, add-to-cart, wishlist, checkout, and payment option workflows. - Developed an admin dashboard allowing order tracking, revenue analytics, inventory management, discount configuration, and CRUD operations on product listings with secure media upload support. - Implemented live order status updates including order placed, shipped, delivered, and canceled, ensuring smooth communication between customer and store operations. - Hosted the platform with custom DNS configuration, tested real-world store usage, and successfully delivered the deployed system to the client as a paid commercial project. - Handled complete project lifecycle including client requirement analysis, UI/UX planning, database design, testing, deployment, and after-delivery support.	

Byte Brainy

Web Development Intern

Bangalore, India (Remote)

Sep 2023 – Oct 2023

- Developed responsive web interfaces using HTML, CSS, JavaScript, and PHP, ensuring clean UI designs and functional user interactions.
- Implemented form handling, basic CRUD operations, and user-focused web features with proper validation and modular code structure.
- Collaborated in a remote environment, applying Agile practices and participating in weekly progress reviews with mentors and the development team.

NOTABLE PROJECTS

Buildly(Website & Presentation Generator) [🔗 Live](#)

- Engineered an AI-powered productivity platform that converts natural language prompts into fully functional websites with live preview and real-time customization.
- Integrated Monaco code editor allowing users to edit generated UI components and download complete project files as a production-ready ZIP package.
- Implemented a generative slide creator that builds branded PPT presentations with editable content and visuals, exportable as .pptx files for professional usage.
- Optimized user experience with low-latency rendering, clean component architecture, and scalable deployment for real-world usage.

DiliGenie (RAG-based AI Document Assistant) [🔗 Live](#)

- Built a Retrieval-Augmented Generation (RAG) system enabling users to upload PDFs and Word documents for intelligent querying and real-time answer generation.
- Implemented text chunking, vector embeddings, and semantic similarity search using Pinecone to deliver accurate, context-aware responses.
- Developed a conversational voice chat interface for interactive hands-free document Q&A using streaming speech recognition and LLM-powered response synthesis.
- Added a personalized dashboard featuring time, weather, and session history for enhanced usability and continuity.
- Optimized multi-doc knowledge retrieval with latency-aware pipelines for fast contextual grounding and improved LLM reliability.

Public Wealth Created(Financial Insights Dashboard) [🔗 Live](#)

- Developed a real-time analytics dashboard comparing company market caps against founders' net worth to highlight public value creation using a visually engaging UI.
- Implemented compliant data scraping with robots.txt guidelines to fetch updated datasets, enhanced with brand logos, smooth animations, and responsive layouts for a premium UX.
- Built and deployed the platform using Next.js (TypeScript), Tailwind CSS, and Firebase hosting to ensure performance, scalability, and reliable access.

AWARDS & ACHIEVEMENTS

Google Gemini Student Ambassador (Selected): Selected through an interview process to represent and promote Gemini AI tools among student developer communities.

Hackathon Participation: Participated in 8+ national and online hackathons across Web3, AI/ML, and full-stack domains, building rapid MVPs and collaborating with cross-functional teams.

CERTIFICATES

Microsoft — Generative AI Foundations (2025) [🔗 Verify](#)

Oracle Cloud Infrastructure — AI Foundations Associate (2025) [🔗 Verify](#)

Harvard University — CS50 Introduction to Programming with Python (2025) [🔗 Verify](#)

HackerRank — SQL (Advanced) Certificate (2025) [🔗 Verify](#)
